## Training

**Cyber Security Essentials** *Certificate Link* **Jun 2025 - Jul 2025**
*Lovely Professional University*

- Mastered core Cybersecurity architecture, including the OSI model and TCP/IP stack, applying network traffic analysis to pinpoint and document vulnerabilities.
- Developed advanced Linux proficiency, utilizing command-line operations and file system auditing to harden and secure multi-user environments.
- Executed end-to-end penetration testing on the TryHackMe platform, successfully navigating reconnaissance, web exploitation, and privilege escalation scenarios.
- Utilized industry-standard scanning tools to perform vulnerability assessments, establishing a systematic framework for threat identification and mitigation.

## Projects

**Fixora** | *MERN Stack, Express.js, Node.js, React, MongoDB, Git* **Feb 2026 - March 2026**

- Engineered a full-stack web application designed to streamline service management and issue tracking, utilizing **React** for a dynamic frontend and **Node.js/Express.js** for a robust backend architecture.
- Developed a centralized database schema using **MongoDB** to manage user data, service requests, and real-time status updates efficiently. Applied MERN stack knowledge successfully to create a fully functional MERN stack website.
- Implemented secure user workflows and state management to ensure seamless navigation and data integrity across the platform.
- Github Repository Link: **https://github.com/Raushan-7/Fixora**

**Preventive Maintenance in Machinery** | *Python, Machine Learning, Scikit-learn, Streamlit* **March 2025 - April 2025**

- Architected an AI-driven system that achieves 96% accuracy in predicting machinery failures by analyzing sensor data and stress metrics.
- Designed a dual-interface platform featuring a Streamlit web dashboard for visual analytics and a CLI tool for terminal-based health monitoring.
- Integrated SHAP (SHapley Additive exPlanations) insights to provide transparent, model-based explanations for maintenance recommendations.

## Certificates

**Computational Theory** **August 2025**
*Infosys — Certificate Link*

**Master Generative AI & Generative AI tools** **August 2025**
*Infosys — Certificate Link*

## Technical Skills

**Languages C,** C++, Java, JavaScript, Python

**Technologies/Frameworks**: React JS, Node JS, Git, GitHub

**Skills**: Data Structures and Algorithms, Problem-Solving, Responsive Web Design, Scripting in Python and JavaScript

## Education

**Lovely Professional University** **2023 – Present**
*Computer Science and Engineering — CGPA: 7.47* *Jalandhar, Punjab*

**St. Joseph's High School** **2021 – 2022**
*12th with Science — Percentage: 72.40%* *Patna, Bihar*

**Gurukul Kurukshetra** **2019 – 2020**
*10th with Science — Percentage: 93%* *Kurukshetra, Haryana*
